```javascript
1  "use strict";
2  $(document).ready( () => {
3
4      // preload images
5      $("#image_list a").each( (index, link) => {
6          const image = new Image();
7          image.src = link.href;
8      });
9
10      // set up event handlers for links
11      $("#image_list a").click( evt => {
12          // get clicked <a> tag
13          const link = evt.currentTarget;
14
15          // swap image
16          $("#main_image").attr("src", link.href);
17
18          //swap caption
19          $("#caption").text(link.title);
20
21          // cancel the default action of the link
22          evt.preventDefault();
23      });
24
25      // move focus to first thumbnail
26      $("li:first-child a").focus();
27  });
```
