```javascript
1  "use strict";
2  $(document).ready(() => {
3
4      // process each img tag
5      $("#image_rollovers img").each( (index, img) => {
6          const oldURL = img.src;        // gets the src attribute
7          const newURL = img.id;         // gets the id attribute
8
9          // preload rollover image
10         const rolloverImage = new Image();
11         rolloverImage.src = newURL;
12
13         // set up event handlers for hovering over an image
14         $(img).hover(    // use jQuery syntax to access hover() method
15             () => img.src = newURL,   // hover over
16             () => img.src = oldURL    // hover out
17         );
18     });
19
20 });
```
